Goals, activities and expected results

SISCOG has been dedicated to the development of systems for the optimised planning and management of resources for the passenger transport sector at an international level. Currently, in addition to Portugal, it has clients in 7 countries, in 2 continents. Almost 100% of the turnover comes from software exports totally "made in Portugal".

The objectives of this project are:

- strengthen international turnover,
- by attracting new clients and
- diversifying current markets, and
- launching a new area related to Data Science and Machine Learning.
